INDEX TO VOLUME LIV, 1942

PAGE

Acrylic Plastics (Note) ... 120
Air Raid Precaution Measures (Note) ... 480
Air, Temperature-Entropy Diagram for, Based on Spectroscopic Specific Heats, by F. C. Marggraff, Jr. and Robert H. Senner ... 167
Angles in Space (Note) ... 660
Angles Between Planes (Note) ... 666
Association Notes ... 149, 322, 493, 677
Bearings and Lubrication (Note) ... 408
Blackouts (Note) ... 125
Boiler Efficiency, Overall, Determinations by the Difference Method, by Samuel Letvin ... 172
Book Reviews:
Mark's Handbook ... 145
The Radio Amateur's Handbook ... 145
Practical Marine Diesel Engineering ... 320
The Radio Amateur's Handbook ... 320
High Speed Internal-Combustion Engine ... 320
Marine Diesel Handbook ... 492
Marine Engineering, Volume One ... 673
Handbook of Ship Calculations, Construction and Operation ... 674
Introduction to Naval Architecture ... 675
Static Defense of Strategic Oil Installations ... 675
Caissons, Wooden (Note) ... 132
Checking Propellers, A New Method for, by Lewis H. Kenney ... 8
Christenson, Arthur L., Herbert Friedman and Herman F. Kaiser; Applications of Geiger-Muller Counters to Inspections with X-Rays and Gamma Rays ... 177
Compressed Air Radiation, Successful Substitution of Non-Critical for Critical Metals in, by L. F. Wilson ... 210
Cooper, Howard L.; Control of Internal Hydraulic Flow Conditions ... 153
Corrosion of Steel by Steam at High Temperature (Note) ... 133
Creep, Mechanics of for Structural Analysis (Note) ... 577
Development of a Graphical General Solution for Thermal Circulation in U-Tube Hydraulic Circuits, by Carl R. Midtlyng ... 327
Diesel Engine Crankshafts, Axial Vibration of (Note) ... 616

PAGE

Dinger, H. C., Discussion of "Factor of Safety and Working Stresses of Marine Propulsion Shafting" by R. Michel in February, 1942, Journal ... 214

Discussion of Article "Factor of Safety and Working Stresses of Marine Propulsion Shafting" by R. Michel, in February, 1942, Journal, by H. C. Dinger ... 214

Distance Requirements, Minimum, in the Gamma Radiography of One and Three Inch Steel Sections, by Herman F. Kaiser, Herbert Friedman and Robert Hafner ... 15

Dungan, Paul Baxter, Obituary ... 147

Dusty Chronicle (Note) ... 123

Dynamic Balancing (Note) ... 266

Dynamic Testing in Germany (Note) ... 296

End Losses of Turbine Blades (Note) ... 454

"End Losses of Turbine Blades," Commentary on, by D. Eng. J. Kreitner ... 574

Engineering, Wartime (Note) ... 466

Engineering Approach, Use of Simple Quantitative Analyses, by R. E. W. Harrison ... 1

Enthalpy of Superheated Steam, by James W. Murdock ... 370

Factor of Safety and Working Stresses of Marine Propulsion Shafting by R. Michel ... 50

Feed System, Regenerative, by Abraham Solov ... 495

Fits and Tolerances (Note) ... 489

Friedman, Herbert, and Herman F. Kaiser and Robert Hafner; Minimum Distance in the Gamma Radiography of One and Three Inch Steel Sections ... 15

Friedman, Herbert, Herman F. Kaiser and Arthur L. Christenson; Applications of Geiger-Muller Counters to Inspection with X-Rays and Gamma Rays ... 177

Gages and Gaging Procedure (Note) ... 273

Gamma Radiography of One and Three Inch Steel Sections, Minimum Distance Requirements in, by Herman F. Kaiser, Herbert Friedman and Robert Hafner ... 15

Geiger-Muller Counters, Applications of to Inspection with X-Rays and Gamma Rays, by Herbert Friedman, Herman F. Kaiser and Arthur L. Christenson ... 177

Graph Paper, Probability, and its Engineering Applications (Note) ... 103

Graphical Integration, Refinements in Methods of (Note) ... 438

Hafner, Robert, and Herman F. Kaiser and Herbert Friedman; Minimum Distance Requirements in the Gamma Radiography of One and Three Inch Steel Sections ... 15

"Handbook of Ship Calculations, Construction and Operation" by Charles H. Hughes, (Book Review) ... 674

PAGE

Harrison, R. E. W.; Engineering Approach, Use of Simple "Quantitative Analyses" ... 1
Heat Transfer Problems, Electrical Machine Solves (Note) ... 137
High Speed Action, Aids for Analyzing (Note) ... 97
High Speed Internal-Combustion Engine, by Harry R. Ricardo (Book Review) ... 320
Hull and Its Screw Propeller, by E. A. Stevens, Jr.
Part I ... 372
Part II ... 534
Hydraulic Circuits, U-Tube, Development of a Graphical General Solution for, Thermal Circulation in, by Carl R. Midtlyng ... 327
Hydraulic Flow Conditions, Internal, Control of, by Howard L. Cooper 153
Ice-Breaker *Ernest Lapointe* (Note) ... 258
Iceless Ice (Note) ... 124
Ice Machine, Tube, New (Note) ... 657
Inspection with X-Rays and Gamma Rays, Applications of Geiger-Muller Counters to, by Herbert Friedman, Herman F. Kaiser and Arthur L. Christenson ... 177
Inspector's Point of View (Note) ... 317
Introduction to Naval Architecture (Book Review) ... 675
Jewels, Industrial Use of (Note) ... 301
Kaiser, Herman F., and Herbert Friedman and Robert Hafner; Minimum Distance in the Gamma Radiography of One and Three inch Steel Sections ... 15
Kaiser, Herman F., Herbert Friedman and Arthur L. Christenson; Applications of Geiger-Muller Counters to Inspections with X-Rays and Gamma Rays ... 177
Kenney, Lewis H., A. New Method for Checking Propellers ... 8
Kiralfy, Alexander; The Effect of National Policy Upon Naval Architecture and Engineering ... 511
Kreitner, J. D. Eng.; Commentary on "End Losses of Turbine Blades" 574
Launching of Submarines, Side (Note) ... 84
Letvin, Samuel, Overall Boiler Efficiency Determinations by the Difference method ... 172
Marggraff, F. C., Jr. and Arthur H. Senner; A Temperature-Entropy Diagram for Air based on Spectroscopic Specific Heats ... 167
"Marine Engineering, Volume One" (Book Review) ... 673
Mark's Handbook, (Book Review) ... 145
Marine Propulsion Shafting, Factor of Safety and Working Stresses of, by R. Michel ... 50
Metal Parts, High-Production High-Economy Methods for (Note) ... 218
Michel, R.,; Factor of Safety and Working Stresses of Marine Propulsion Shafting ... 50
Midtlyng, Carl R.; Development of a Graphical General Solution for Thermal Circulation in U-Tube Circuits ... 327

PAGE

Murdock, James W.; Enthalpy of Superheated Steam ... 370
National Policy, The Effect of Upon Naval Architecture and Engineering, by Alexander Kiralfy ... 511
Naval Architecture and Engineering, The Effect of National Policy Upon, by Alexander Kiralfy ... 511
Noise in Oil Engines, Suppression of (Note) ... 605
Non-Critical Metals, Successful Substitution for Critical Metals in Compressed Air Radiation, by L. F. Wilson ... 210
Oil Engine, Suppression of Noise in (Note) ... 605
Overall Boiler Efficiency Determinations by the Difference Method, by Samuel Letvin ... 172
Personnel, Subordinate, Selection of (Note) ... 89
Plastics, Acrylic (Note) ... 120
"Practical Marine Diesel Engineering" (Book Review) ... 320
Propeller, Screw, Hull and, by E. A. Stevens, Jr.
Part I ... 372
Part II ... 534
Propellers, A New Method for Checking, by Lewis H. Kenney ... 8
Quantitative Analyses, Use of; Engineering Approach by R. E. W. Harrison ... 1
Radio Amateur's Handbook (Book Review) ... 145
The Radio Amateur's Handbook, American Radio Relay League, (Book Review) ... 320
Recently Developed Materials, Condensed Review (Note) ... 84
Science in the Defense Program (Note) ... 308
Scrap Identification Tests Rapid (Note) ... 649
Senner, Arthur H., and F. C. Marggraff, Jr.; A Temperature-Entropy Diagram for Air Based on Spectroscopic Specific Heats ... 167
Solov, Abraham; The Regenerative Feed System, Compared to the Conventional Closed Feed System in a Naval Vessel ... 495
Sparks from Aluminum Painted Steel (Note) ... 491
"Static Defense of Strategic Oil Installations" (Book Review) ... 675
Stevens, E. A. Jr.; The Hull and Its Screw Propeller
Part I ... 372
Part II ... 534
Submarines, Side Launching of (Note) ... 84
Superheated Steam, Enthalpy of, by James W. Murdock ... 370
Temperature-Entropy Diagram for Air Based on Spectroscopic Specific Heats, by F. C. Marggraff, Jr. and Arthur H. Senner ... 167
Thermal Stresses and Shrinkage in Welded Ship Construction (Note) 76
Training and Grading, Marine Engineers, Systems of (Note) ... 59
Thermal Circulation in U-Tube Hydraulic Circuits, Development of a Graphical General Solution of, by Carl R. Midtlyng ... 327
Turbine, Rotating Boiler (Note) ... 315
Turbine Blades, End Losses of (Note) ... 454

PAGE

Turbine Capacity and Efficiency, Effect of Nozzle and Bucket Deposits on (Note) 594
Vibration of Diesel Engine Crankshafts, Axial (Note) 616
Wartime Engineering (Note) 466
Welded Ship Construction, Thermal Stresses and Shrinkage in (Note) 76
Welding Fumes from Arc Welding (Note) 650
Welding and Cutting in Ship Construction, Survey of (Note) 279
Welding Jigs and Manipulators (Note) 450
Wilson, L. F.; Successful Substitution of Non-Critical for Critical Metals in 210
Working Stresses of Marine Propulsion Shafting, Factor of Safety and Working Stresses in, by R. Michel 50
X-Rays, Industrial, Million-Volt (Note) 426

PAGE.

Turbine Capacity and Efficiency, Effect of Nozzle and Blades Opposite
on (Note)
Vibration of Diesel Engine Crankshafts, Axial (Note)
Warships, Engineering (Note)
Welded Ship Construction, Thermal Stresses and Shrinkages in (Note)
Welding Bronze from Arc Welding (Note)
Welding and Cutting in Ship Construction, Survey of (Note)
Welding Jigs and Manipulators (Note)
Welton, L. E., Successful Solderation of Monel Alloys (Note)
Metals, in
Working Stresses of Marine Propulsion Shafting, Factors of Safety and
Working Stresses to be E. Method
X-Rays, Industrial, Miller-Voit (Note)
